

Custom-Built Kits for Your Classroom

The **Fisher Science Education** team is proud to bring you the convenience of custom educational kits for elementary-to college-level instruction. Specialists will help you select the right products and create your kit, delivering the final result to your classroom. With uniquely-designed packaging and product combinations, the possibilities are endless.

How to Get Started

- 1 Outline the Project**
Determine your budget, delivery date, and other details and specifications.
- 2 Review Your Curriculum**
Discuss existing classroom materials to help create new hands-on learning opportunities.
- 3 Develop a Plan**
Allow product specialists to generate a list of materials based on your budget.
- 4 Align on Production**
Wait for packaging materials, inserts, or supporting documents to be designed and added to a sample kit for your final review and approval.
- 5 Place Your Order**
Once all aspects are approved, materials will be purchased, and the kits assembled.
- 6 Await Delivery**
Kits will ship directly to the address provided by the expected delivery date.

Our Program Offers:

- Over 15 years of custom kitting experience
- Commitment to quality (ISO 9001:2015 certified)
- Initiatives that reduce waste and increase efficiency
